

Step vans are great candidates for electrification, due to the last-mile, fixed route operations and return-to-depot patterns. All-electric step van fleets can include large parcel/delivery, linen/uniform, food/beverage, and specialty applications such as food trucks, bookmobiles, medical, and more.

Motiv Power Systems has been electrifying step vans serving communities as the backbone of modern commerce since 2015. Customers include Purolator, Cintas, AlSCO, Aramark, Bimbo Bakeries, USPS, and more.

Features & Benefits

- » Up to 85% operating and maintenance savings
- » Proprietary 5th generation technology
- » Commercially proven battery packs
- » More than 170 vehicles and 2 million miles
- » Independent battery control improves reliability, range, and performance
- » Over-the-air software updates
- » Lift gate control and interlock support
- » Multiple body configurations available
- » Proprietary Hill Hold technology ensures vehicle and driver safety
- » Manual parking brake for state and federal compliance
- » Unique redundant high voltage safety systems protects operator and vehicle
- » Proprietary AdaptEV™ and Adaptive Battery Controller (ABC) manage battery temperatures to optimize charging, cold weather performance, and safety
- » Customizable regenerative braking settings for maximum range and operator comfort

EPIC5/6 Vehicle Specifications

MOTIV PLATFORM	EPIC5 or EPIC6
MAX GVWR	19,500 or 22,000 lbs
BATTERY TECHNOLOGY	Lithium-ion
BATTERY CAPACITY	127 kWh
RANGE AT MAX GVWR	105 miles
PAYLOAD	Up to 10,000 lbs
P-RATING	P800 to P1200
OVERALL LENGTH	26' to 30'
WHEELBASE	208"
MAX SPEED	65 mph
PEAK MOTOR TORQUE RATING	2,400 Nm / 1,770 ft-lbs
GRADEABILITY	20%
REGENERATIVE BRAKING	Standard
LEVEL 2 AC CHARGING	19.2 kW / J1772
50% CHARGE TIME	~2.5 hours
100% CHARGE TIME	~8 hours
LEVEL 3 DC FAST CHARGING (Optional)	60 kW / CCS

Additional Options

- » Leasing and financing
- » Charging infrastructure and installation
